Summary

I'm a client-focused software engineering graduate, well-versed harnessing transformative technologies to tailor solutions. Fluent in JavaScript, I craft interactive web domains and rigorously test software for seamless user experiences. Proficient with front-end frameworks like React and Angular, I create captivating interfaces, seamlessly integrating Redux for smooth state management. Rooted in software engineering principles, I architect intuitive, client-centric solutions that consistently surpass expectations. Fueled by innovation and a deep grasp of software engineering, my goal is to deliver results that resonate profoundly with users and stakeholders. I'm excited to apply my skills, fashioning impactful solutions that leave indelible positive impressions.

Education

2017-2022
BACHELOR OF ENGINEERING (COMPUTER)
SKN Sinhgad Institute OF Technology And Science

2016-2017
H.S.C
A.S.C College of Chopda

2014-2015
S.S.C
Vivekanand Vidyalay Chopda

Skills

CORE SKILLS
Primary ->
ReactJS | JavaScript | TailwindCSS | CSS | HTML
Secondary->
AngularJS | PHP | Manual Testing

SOFT SKILLS
Problem Solving | Communication | Critical Thinking | Multitasking | Planning | Flexibility | Customer-Focused

Experience

July 2022 - Present
Technical Veer Digital Services

JUNIOR FRONT-END DEVELOPER

- Developed and enhanced responsive user interfaces using ReactJS, resulting in improved user experiences and higher engagement rates.
- Leveraged third-party libraries and APIs to expand application capabilities, effectively delivering additional features and functionalities to end-users.
- Employed Redux for streamlined state management, ensuring consistent data flow and optimizing application performance.
- Implemented RESTful APIs to fetch and update data, contributing to the real-time functionality of the application and enabling dynamic user interactions.
- Proactively identified and resolved performance bottlenecks, significantly enhancing application speed and responsiveness.
- Stayed up-to-date with latest ReactJS and JavaScript trends and best practices, sharing insights and fostering culture of continuous learning within the development team.

March 2022 - May2022
Aarohi Software Development

FRONT-END DEVELOPER INTERN

- Collaborated on web application features, optimizing code for stability, scalability, and performance.
- Demonstrated expertise of JavaScript, CSS, HTML, and front-end languages, with a good understanding of progressive web applications.
- Applied strong problem-solving skills, having debugged and resolved multiple issues in software applications.

Projects

BANK WEBSITE ->

- Exploited Vite and ReactJS to create the Bank website, ensuring that it was optimized for fast loading speeds and a smooth user experience.
- Established a responsive React JS application that includes a visually impressive hero section and reusable feature sections with call-to-action buttons and testimonials

TRAVEL APP ->

- Developed a responsive Travel App using ReactJS, enabling users to view destinations and photos divided into different categories such as Luxury,
- Adventure, and Mystery. Leveraged knowledge of hooks and other ReactJS features to optimize app performance and enhance the user experience
- Employed a well-structured file system and well-organized code to ensure the app's maintainability and scalability
